RECENT RAIN SPELL

CURRENT MONSOON RAIN SPELL DEADLY FLOODS DEVASTATE AN ALREADY FRAGILE SINDH

Shahid Buledi

In South Sindh, the Current New spell of thunderstorm rain has been started on 10th September 2022 at Umerkot, Badin, Mirpurkhas, and Thatta, torrents of floodwater have ripped away everything, swept Katcha/Pakka Houses off their foundations, and roared through the everywhere in the land, turning whole districts into inland seas. More than 4 people have died so far, and more than one hundred of relief camps have suffered in Mirpurkhas, Umerkot, Thatta, and Badin.

After nearly three months of incessant rain, much of Sindh and Specially the aforementioned district's agrir and dry land (residnetial) is now underwater, raising the specter of food shortages in what is likely to be the most destructive monsoon season in the Sindh's recent history.

SRSO is using boats, Donkeys, whatever means possible to deliver relief items to worst-hit areas and which has been severely affected. SRSO within limited resources is trying best, but Sindh was hit worse now than in the 2010 floods."

The human crisis unfolding this summer is the latest extreme weather event in a Sindh often ranked as one of the most vulnerable to climate change. Pakistan this spring began experiencing record-breaking, drought-intensifying heat, which scientists concluded had been 30 times as likely to occur because of human-caused global warming. Now much of the Sindh is underwater.

Mirpurkhas, Umerkot, Badin and Thatta

RAPID NEED ASSESSMENT

Rapid Need Assessment-Results

Theme/Area	Situation	Need
Dewatering	The current situation is worst because mostly 30% to 40% Villages are submerged into water and surrounding water is standing everywhere in their villages.	There is dire need of dewatering from their villages and houses and need to initiate the dewatering to return their homes.
Shelter	In the Eight assessed districts, the total affected HHs are 1,109,516; out of which 610,819 are partially damaged and 133,140 are fully damaged.	1- Tents, Tarpaulin Sheets 2- Shelter kits & reconstruction materials 3- Rehabilitation and reconstruction of Houses/rooms 4- Cash for work as a preferred modality for rehab/reconstruction. 5- Coarse and thick large prices of cloths to create area of privacy for women
	Exposure to open-atmosphere and mosquito production increased due to water-logging	Mosquito nets and Mosquito repellents
	Animals shades are mostly damaged, being more fragile and will be exposed to harsh weather.	1-Provision of Animals shades are mostly damaged, being more fragile and will be exposed to harsh weather of winter, 2-On small scales, animals shades can be provided as support
	Due to Mosquitos and no fodder for livestock, the death rate is increased day by day.	
WASH (Water)	Water sources are damaged either partially or fully in most affected areas . In Deserted areas open Wells are damaged and DWSS on Tube-Wells are mostly damaged. The major issues with DWSS is recorded as damages of pipelines. Availability of drinking water has been a significant problem.	Provision of water-supply through water-tanks in areas with high demand and need for water . 2-Rehab of Communal based DWSS through provision of pipelines or other minor issues if occurs.
Sanitation	Pit latrines/Community straw huts made latrines are inundated, the structures are perished and septic areas filled with mud/rain water. It is also a critical protection issue for women and PWDs.	Provision of pit latrines at relief camps or at houses and if there are funds of materials for latrines construction
Hygiene	Personal hygiene has been a substantial issue	1- Hygiene awareness sessions 2- Provision of hygiene kits 3- Distribution of dignity/MHM kits for adult girls and women
Food and Livelihood	Agri-crops and vegetables are completely inundated Horticulture is substantially damaged Savings of low-income and daily wages dependent HHs is lost Labor and daily wage earners are affected	Unconditional and conditional (Cash for Work) cash distribution in vulnerable families, 2- Provision of food packages (Dry Ration Bags and Cooked Food) and nutrition for highly vulnerable families, pregnant/lactating mothers and the neonates and babies 3- Distribution Seasonal agri-seeds for promoting home garden (KG) for promoting improved nutrition.
	Food stocks are badly affected Accessibility issues have increased Kitchens got damaged	Provision of food items (Dry Ration Bags) on large scale and immediate basis and Provision of kitchen utensils (sets).
	Small enterprises are reportedly damaged as evident in assessment findings	Business Development Groups and People need small unconditional Cash grant for revitalization of their business.
	Outbreak of diseases in animals caused their deaths	1- Carpet vaccination of livestock, 2- Coordination with livestock department and diagnosis, medication in target areas
Coordination	Coordination needs to be strengthened more with response and humanitarian organization by onboarding the local district administration for more relief work to approach all the affectee.	The SRSO Team and District Managers must establish a well-coordinated response is need within hours to provide support to the community.

Vaccinated Equine Animals, distributed mosquito nets, tarpaulin, food bags and cloths in Sukkur on 10th september 2022 with support of Brooke International.

SRSO-Brooke Project Larkana Team Veterinary Officer Dr. Mohsin Ali Solangi with the support of Brooke Pakistan CAHO Dr. Rab Nawaz and SM Sajjad distributed 147 Feed/Fodder Bags in communities at village Jhando Sehro and Qalanderabad Larkana. In addition to this, SRSO-Brooke Veterinary Officer Larkana has treated 15 Equine Animals

Voice From Field

A community named Shahnawaz Bk has a settlement at village Soomra Shakh and was communicated with Brooke CAHO. A community change agent was requested to the Brooke team to give animal rations on an urgent basis. He said we do have not resources for animal feed and fodder so please give us animal ration because two animals die due to not being available for feeding. Brooke's team provided feed and fodder at night time with the support of DM Jacobabad. Vaccination 168

In Need Support Stakeholders

MHM/Dignity Kit Distribution

WASH-Safe Drinking water Access

The outbreak of waterborne diseases in the areas hit by recent record-breaking floods in Sindh. This could worsen in the future due to a lack of access to safe drinking water facilities, which commonly occur during floods, which can increase the transmission of the disease.

SRSO social mobilization teams have reached the areas, where water-borne diseases outbreak is observed after flood effects. To Overcome this essential need for safe drinking water, SRSO social mobilization teams district Larkana stepped forward and conducted a dialogue with VO Mangria UC Puranoabad taluka Bakrani regarding the significance of safe drinking water in our lives after that a demonstration has been rehearsed on how water can be purified by using Aqua Water purification tablets. After that 200 water purification tablets have been provided to the 20 households for 10 days, each household will consume one tablet a day to purify the water.
