* The assessment was started on July 17, 2022 therefore results may vary because the villages were visited before the starting of heavy continuous rain falls, so their current situation might have changed in terms of the magnitude of damages. The assessment data is being collected in two ways i.e. through Focus Group Discussions (FGDs) with CIs Leaders and members and visits to affected areas by social mobilization teams (SMTs) and direct interaction with affected households regarding the extent of damages/losses. This also involves the physical verification process at the ground level with the affected population.

This information is based on the initial assessment while the final and accurate assessment would be ascertained after the joint damage assessment survey, which is in progress.

This report is produced by the OCHA Humanitarian Advisory Team (HAT) in Pakistan in collaboration with humanitarian partners. It covers the period from 24-30 September 2022. The next report will be issued on or around 7 October 2022.

HIGHLIGHTS

- Prevalence of water-borne and vector-borne diseases is a growing concern especially in Sindh and Balochistan, where many districts remain inundated.
- Around 1.6 million women of reproductive age, including nearly 130,000 pregnant women, need urgent health services.
- 8.62 million people in 28 assessed districts estimated to be in crisis and emergency phases of food security between September and November 2022, according to preliminary findings from Balochistan, Sindh and Khyber Pakhtunkhwa – including some 5.74 million people in flood-affected districts covered by the assessment.
- Government-led multi-sectoral rapid needs assessments completed in Sindh, Punjab and Khyber Pakhtunkhwa with the support of NGOs and the UN.

Impact of the 2022 floods on agriculture in Pakistan's Sindh Province

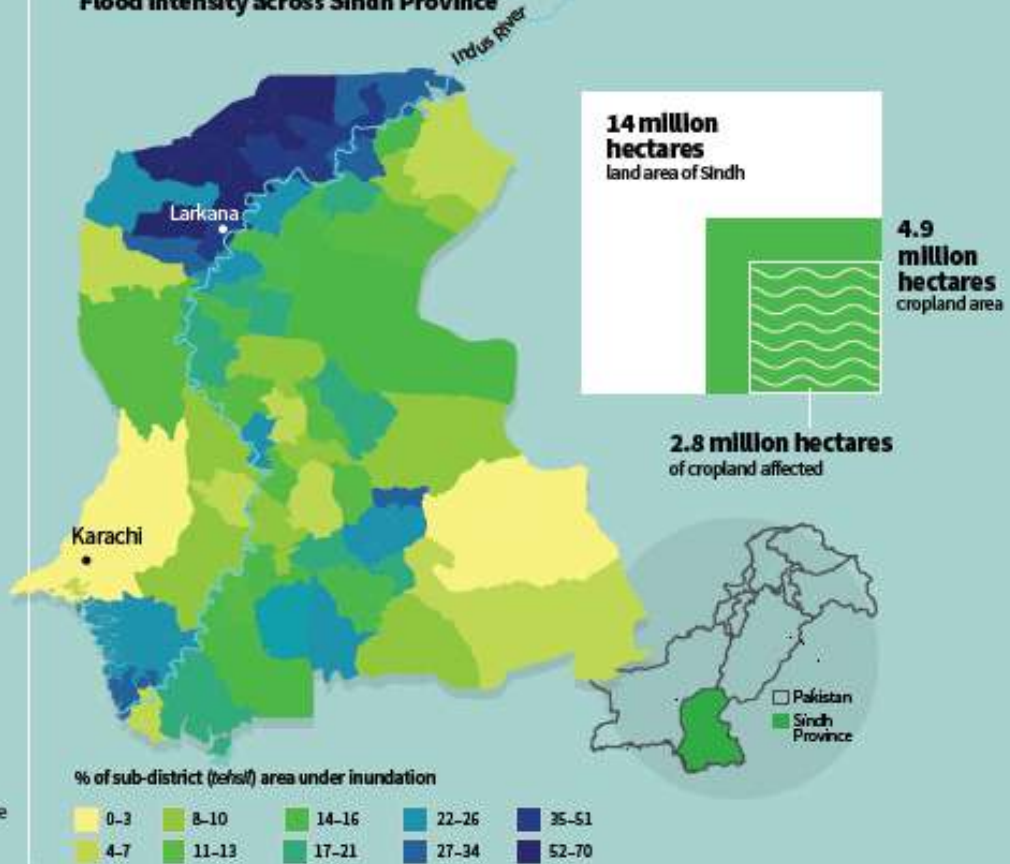

Rainfall (August 2022)

33 million affected across Pakistan

Flood intensity across Sindh Province

Loss of three major crops in Sindh

Crop	Production loss	Economic loss in USD
Rice	1.9 million tons	543 million
Cotton	3.1 million bales	485 million
Sugarcane	10.5 million tons	273 million

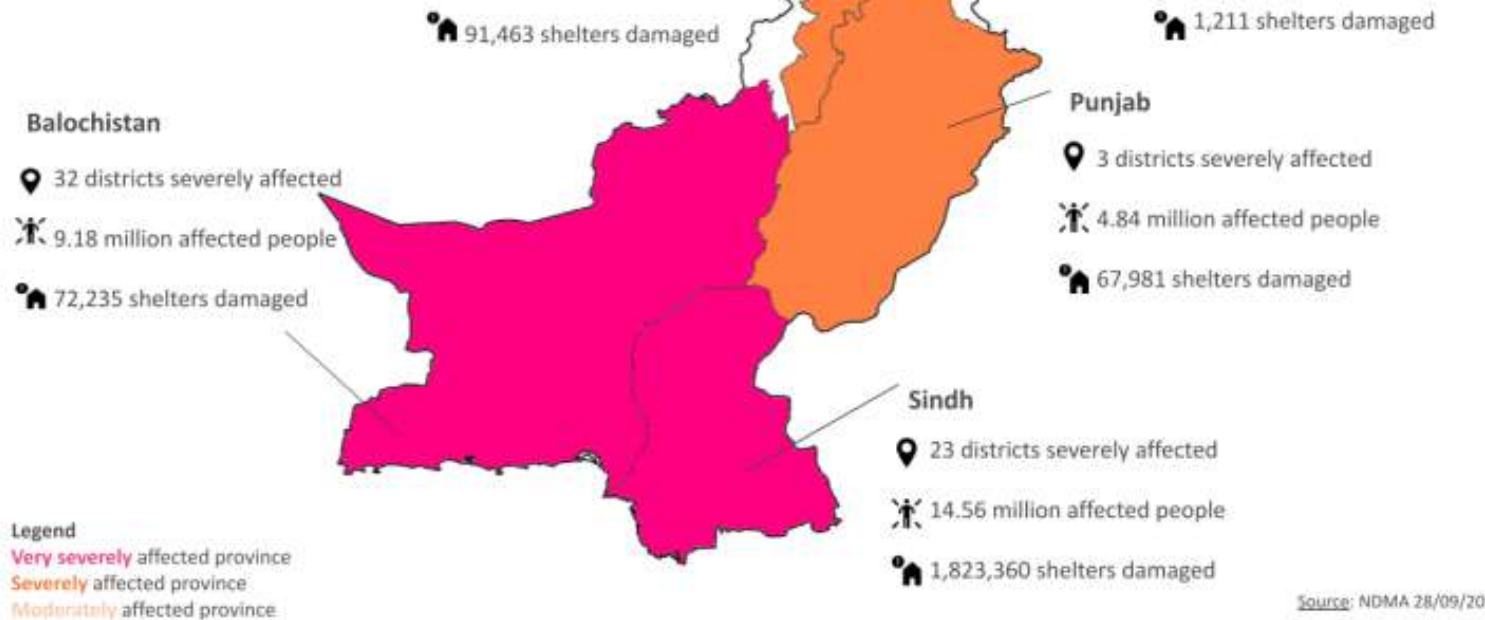

Total agriculture economic loss in Sindh

Provincial level

The five most affected provinces are Balochistan, Sindh, Khyber Pakhtunkhwa, Punjab and Gilgit-Baltistan. However, many more districts, without an official 'calamity' official level are also reportedly impacted.

Overview of main flood impacts in Pakistan 28 September 2022

Source: NDMA 28/09/2022

Sindh Province

Cross sector

Key figures

- The floods in several areas of Sindh over the past week have raised the affected population recorded by the PDMA to 11.9 million and 2.2 million households, an increase of about 10 per cent, but this has not been reflected in the NDMA, where the affected population remains at 14.5 million, with no change in the past few days ([NDMA 28/09/2022](#), [PDMA 27/09/2022](#)).
- 7.25 million people remain displaced, of which 1.21 million in Khairpur, 1.07 million in Larkana, 804,000 in Dadu and 557,000 in Umerkot. 377,000 people remain displaced in camps in Sindh, yet this represents a reduction of more than 40% over the previous week ([PDMA 21/09/2022](#), [PDMA 27/09/2022](#)).
- Priority needs include shelter and food, followed by potable water and sanitation services and NFIs ([IRC 06/09/2022](#)).

Latest updates

- **Water levels:** Floodwaters are rapidly receding in different parts of Dadu district. However, the water levels have shown no sign of decreasing in Khairpur Nathan Shah, Bhan Syedabad and Johi districts ([Dawn 24/09/2022](#)).
- **Population affected:** The floods in several areas of Sindh over the past week have raised the affected population recorded by the PDMA to 11.9 million and 2.2 million households, an increase of about 10%, but this has not been reflected in the NDMA, where the affected population remains at 14.5 million, with no change in the past few days ([NDMA 28/09/2022](#), [PDMA 27/09/2022](#)).
- **8 most affected districts:** Qambar-Shahdadkot, Jacobabad, Larkana, Khairpur, Dadu, Naushehro Feroz, Thatta and Badin were declared the worst-affected districts in Sindh by the National Flood Response Coordination Centre ([Dawn 26/09/2022](#)).
- **IDPs:** 377,000 people remain displaced in camps in Sindh, yet this represents a reduction of more than 40% over the previous week. Larkana is the district with the largest camp population with over 139,000, followed by Hyderabad with 89,000 ([PDMA 27/09/2022](#)). According to a survey by SRSO, 50 to 60% of flood affected people in Dadu, Khairpur, and Naushero Feroz districts have either permanently migrated to safe cities, especially Karachi, or at least in the short term ([Pakistan Today 27/09/2022](#)).
- **Returns:** 3,500 out of around 19,000 IDPs in Karachi are left in government-relief camps, with most having already left to go back to their hometown. 16,000 flood affected people were still hosted at 28 different camps, 8,000 in district East, 3,800 in district West and 3,200 in Malir district ([Dawn 26/09/2022](#)).

Key figures

- 3.7 million acres of crops remain affected by the floods. While the figure is alarming and the highest among the country's provinces, the unusable area has been reduced by more than 20 per cent in the last week. Kamber remains the worst affected district with almost 25% of Sindh's total crops flooded ([PDMA 27/09/2022](#)).
- 414,000 animals killed, mainly in Dadu, N. Feroze and Khaipur, showing a 40% increase since 21 September ([PDMA 21/09/2022](#), [PDMA 27/09/2022](#)).
- Decreased amount of food consumption reported by 68% of key informants ([IRC 06/09/2022](#))
- Access to food and livelihood reported by 14% of the population according to key informants ([IRC 06/09/2022](#))
- Access to markets reported by 32% of the surveyed population according to key informants ([IRC 06/09/2022](#))

Latest updates

- **Shortages of fodder** continue to be reported ([Reuters 20/09/2022](#)), as floods have destroyed fodder needed for livestock feed. Farmers have warned that in the coming weeks, if no relief measures are put in place, they will be unable to provide the fodder they need to feed their livestock ([Pakistan Today 21/09/2022](#)).
- **Loss of crops:** About 50% of the fields remain underwater, according to Jam Khan Shoro, irrigation minister in Sindh ([Pakistan Today 26/09/2022](#)). A loss of around 88% of the total expected cotton production is likely to be lost in Sindh. Damage to sugarcane crops amounted to a loss of USD 273 million. In economic terms, rice, cotton, and sugarcane together faced a direct loss of USD 1.30 billion (rice: USD 543 million, cotton: USD 485 million, and sugarcane: USD 273 million) ([CIMOD 09/09/2022](#)).

Health

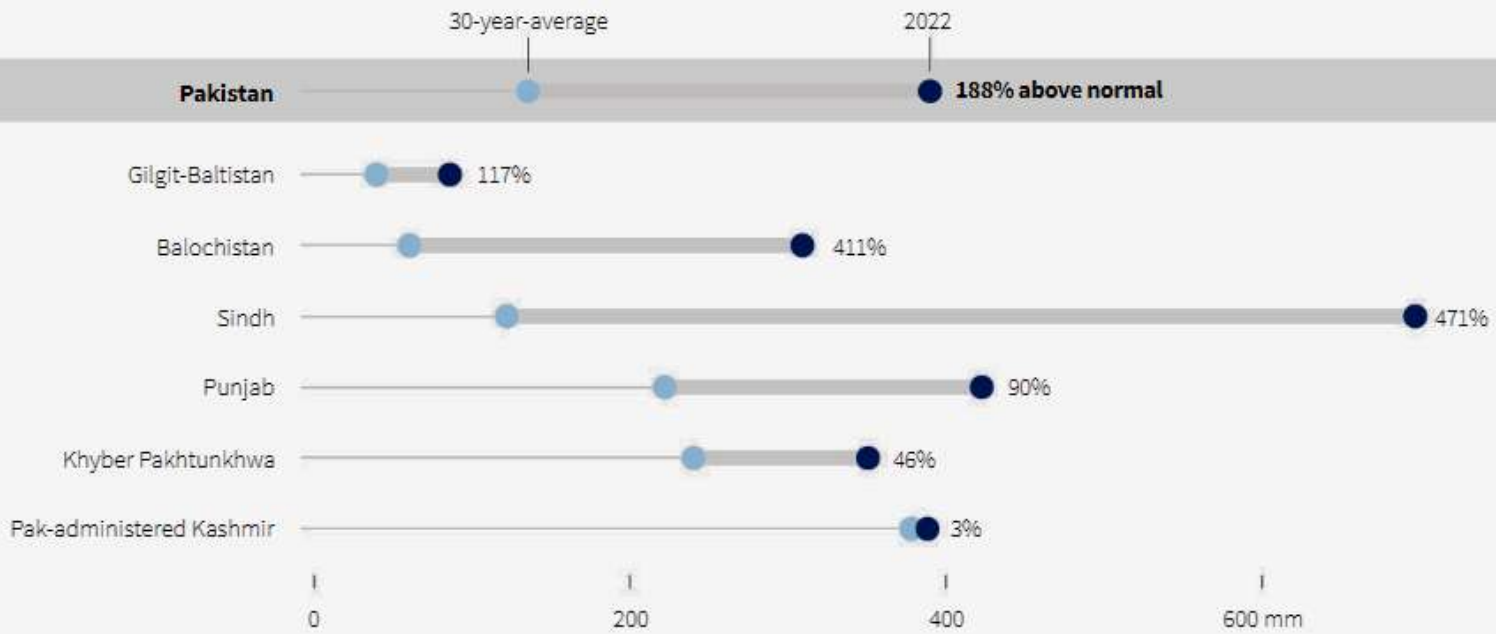

Key figures

- At least 1,200 health facilities have been damaged, mostly in Sukkur, Larkana, Hyderabad, Mirpurkhas and Shaheed Benazirabad ([The Express Tribune 21/09/2022](#), [Pakistan Observer 20/09/2022](#)).
- At least 126 health facilities completely destroyed, of which 65 in Mirpurkhas, 22 in Hyderabad, 17 in Sukkur, 13 in Larkana, 7 in Shaheed Benazirabad and 1 in Karachi ([Dawn 05/09/2022](#)).
- More than 3 million people in flood-affected areas of Sindh infected by various diseases since July, including for gastroenteritis, dengue, diarrhoea, acute respiratory diseases and skin infections according to the Sindh Health Department ([Pakistan Observer 25/09/2022](#)).
- Only 17% of the population can access health services according to key informants ([IRC 06/09/2022](#)).
- Around 30% to 40% of healthcare services without basic medical supplies according to key informants ([IRC 06/09/2022](#)).

Latest updates

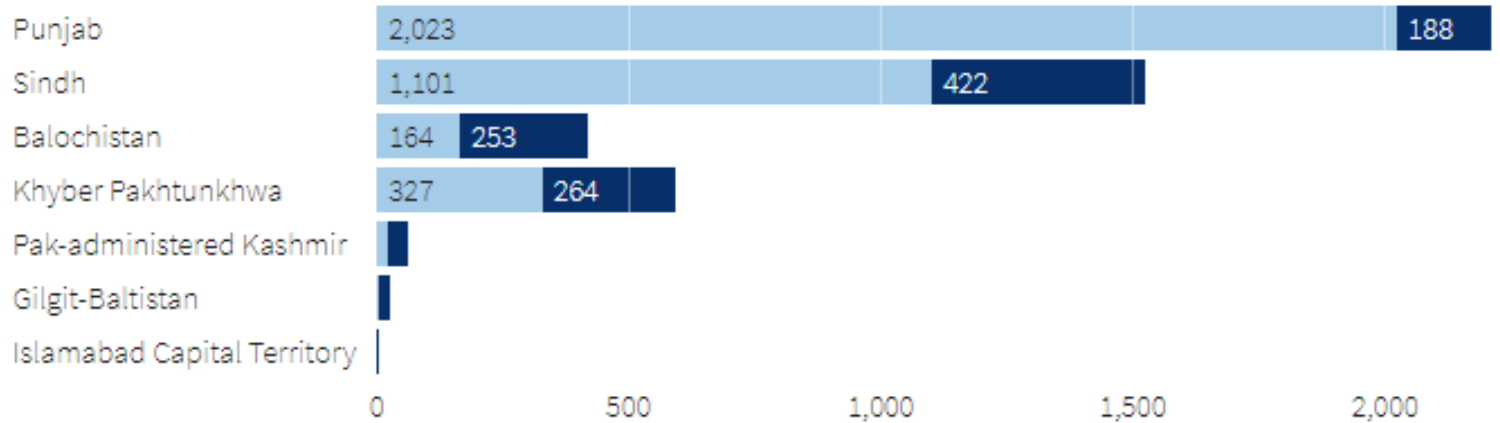

- **Rise in mosquito-borne diseases:** 4,000 malaria cases are being reported daily, reaching 162,395 confirmed cases reported in the province throughout the year, according to health department data ([The Express Tribune 25/09/2022](#)). At least 44,000 suspected cases of malaria were reported last week ([Reuters 21/09/2022](#)). 4,319 dengue patients have been reported in September alone, an increase of 60% of cases in one month ([The Express Tribune 25/09/2022](#)).
- **Increase in outbreak caseloads:** 605,839 cases of diarrhoea and 666,370 cases of skin diseases have been reported in all the districts ([The Express Tribune 25/09/2022](#)). Snake bites are also reportedly on the rise, especially in ([Pakistan Today 26/09/2022](#)).
- **Shortage of health professionals:** Sindh Health Department requested the Health Secretary and the Chief Secretary of Punjab to send at least 380 doctors and paramedics to address the flood-related health crisis in the province ([The Pakistan Observer 24/09/2022](#)).
- **Negative coping mechanisms:** The overcrowding of medical services in Sindh and the crisis over the shortage of pain drugs has led to negative coping mechanisms, such as the use of alternative and unscientific therapies to treat diseases such as dengue fever ([The Express Tribune 24/09/2022](#)).

Relief Activities

Calamity Affected Districts

IMMEDIATE ASSISTANCE REQUIRED-EMERGENCY PHASE

- 1- Dewatering
- 2- Food/Shelter
- 3- Medical Assistance
- 4- Livestock Vaccination

RESCUE & RELIEF

Initially SRSO initiated the rescue and relief operations in submerged water through linkages with other departments to provide the relief operations

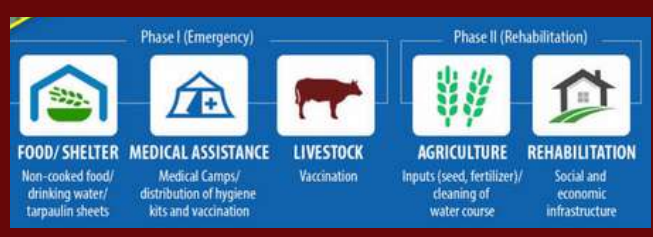

EMERGENCY RELIEF

SRSO initiated to cover the food security by providing the dry ration bags from SRSO core funding and Cooked food by Maria and waheed kitchen .

Rehabilitation

- Conditional/Unconditional Grant
- Agriculture (Inputs: Seed, Fertilizer & Cleaning of Water Course)
- Rehabilitation (Social & Economic Infrastructure)

RAPID NEED ASSESSMENT

Rapid Need Assessment-Results

Theme/Area	Situation	Need
Dewatering	The current situation is worst because mostly 30% to 40% Villages are submerged into water and surrounding water is standing everywhere in their villages.	There is dire need of dewatering from their villages and houses and need to initiate the dewatering to return their homes.
Shelter	In the Eight assessed districts, the total affected HHs are 1,109,516; out of which 610,819 are partially damaged and 133,140 are fully damaged.	1- Tents, Tarpaulin Sheets 2- Shelter kits & reconstruction materials 3- Rehabilitation and reconstruction of Houses/rooms 4- Cash for work as a preferred modality for rehab/reconstruction. 5- Coarse and thick large prices of cloths to create area of privacy for women
	Exposure to open-atmosphere and mosquito production increased due to water-logging	Mosquito nets and Mosquito repellents
	Animals shades are mostly damaged, being more fragile and will be exposed to harsh weather.	1-Provision of Animals shades are mostly damaged, being more fragile and will be exposed to harsh weather of winter, 2-On small scales, animals shades can be provided as support
	Due to Mosquitos and no fodder for livestock, the death rate is increased day by day.	
WASH (Water)	Water sources are damaged either partially or fully in most affected areas . In Deserted areas open Wells are damaged and DWSS on Tube-Wells are mostly damaged. The major issues with DWSS is recorded as damages of pipelines. Availability of drinking water has been a significant problem.	Provision of water-supply through water-tanks in areas with high demand and need for water . 2-Rehab of Communal based DWSS through provision of pipelines or other minor issues if occurs.
Sanitation	Pit latrines/Community straw huts made latrines are inundated, the structures are perished and septic areas filled with mud/rain water. It is also a critical protection issue for women and PWDs.	Provision of pit latrines at relief camps or at houses and if there are funds of materials for latrines construction
Hygiene	Personal hygiene has been a substantial issue	1- Hygiene awareness sessions 2- Provision of hygiene kits 3- Distribution of dignity/MHM kits for adult girls and women
Food and Livelihood	Agri-crops and vegetables are completely inundated Horticulture is substantially damaged Savings of low-income and daily wages dependent HHs is lost Labor and daily wage earners are affected	Unconditional and conditional (Cash for Work) cash distribution in vulnerable families, 2- Provision of food packages (Dry Ration Bags and Cooked Food) and nutrition for highly vulnerable families, pregnant/lactating mothers and the neonates and babies 3- Distribution Seasonal agri-seeds for promoting home garden (KG) for promoting improved nutrition.
	Food stocks are badly affected Accessibility issues have increased Kitchens got damaged	Provision of food items (Dry Ration Bags) on large scale and immediate basis and Provision of kitchen utensils (sets).
	Small enterprises are reportedly damaged as evident in assessment findings	Business Development Groups and People need small unconditional Cash grant for revitalization of their business.
	Outbreak of diseases in animals caused their deaths	1- Carpet vaccination of livestock, 2- Coordination with livestock department and diagnosis, medication in target areas
Coordination	Coordination needs to be strengthened more with response and humanitarian organization by onboarding the local district administration for more relief work to approach all the affectee.	The SRSO Team and District Managers must establish a well-coordinated response is need within hours to provide support to the community.

MOSQUITO FUMIGATION SPRAY

After rain and flash floods, the stagnant water in the rural communities is becoming the breeding ground of diseases specifically vector-borne and water-borne malaria and Gastro.

The major part lacks access to mosquito nets or repellent which is becoming the reason for malaria to flourish even more.

SRSO Kamber shahdadkot, Khairpur, Sukkur, Sanghar after noticing the outbreak of malaria, arrange mosquito sprays in various villages of its district.

WASH-HEALTH & HYGIENE SESSION

Jacobabad team visited flood-affected families in various village SMU Jacobabad Team also delivered the hygiene session* at Village ArfaAbad U/C Jounge Talka Thul District Jacobabad to keep them safe from these fast spreading diseases.

World Food Day observed in Sukkur

KARACHI: Oct 14- Like other parts of the country, the World Food Day was also observed in Sukkur on Friday with an aim to rejuvenating efforts for a sustainable agrifood system to provides sufficient, nutritious and safe foods at an affordable price to all, besides making efforts to end malnutrition and hunger from the province. In this connection, the Sindh Rural Support Organization (SRSO), in collaboration with National Poverty Graduation Programme (NPGP) and other development partners, donor agencies chalk out events in several districts to highlight the importance of the day. According to SRSO Spokesperson, Jamil Soomro, the NPGP Programme aims at assisting the ultra-poor and very poor in graduating out of poverty on a sustainable basis. The Programme activities are being implemented in a number of union councils of different districts in Sindh, which is being implemented by SRSO. On the occasion of World Food Day, the Chief Executive Officer (CEO), SRSO, Muhammad Dital Kalhoro said, more than 80 percent of the extreme poor lives in rural areas and many rely on agriculture and natural resources for their living. He said, according to UN-FAO, the problem is access and availability of nutritious food, which is increasingly impeded by multiple challenges including the COVID-19 pandemic, climate change, inequality, rising prices, etc. We all have to work in this regard, told CEO Mr Kalhoro.
