THE SITUATION ANALYSIS DISTRICT LARKANA

IN NUMBERS

Human Losses

- 25 Men
- 6 Women
- 5 Children
- 156 Males Injured
- 91 Females Injured
- 120 Children Injured

Migration

- 13300 Men
- 7990 Women
- 13210 children

Livestock Death

- 36 Cows
- 53 Goats
- 200 poultry

THE SITUATION

Heavy and sustained rain over multiple days caused flooding and damage to houses, and crops, especially the rice field, which is the main source of district Larkana. Livestock is the main source of livelihood, especially in rural areas, which are badly affected by this situation, currently livestock facing viral and waterborne diseases, and this would be increased in the future due to stagnant water in their localities. Availability of fodder also seemed a challenge in this situation. The community is shifting their livestock on roads and embankments. The mortality of livestock may be increased if this situation prevails.

Due to this continuous rain, a significant number of houses have been damaged and many villages are completely underwater, the community is shifting their families into government schools, and roads. In this situation, most of the families needed food/ration, shelter, NFIs, WASH, and medical assistance on immediate bases, and same time fodder, treatment, and Vaccination for livestock to reduce potential losses of human lives to protect their livelihood sources.

THE SITUATION ANALYSIS

The heavy rains triggered the flooding situation in the entire district. The rain has been stopped but it has devastated everything leaving situation deteriorated. The district administration has declared the whole district as calamity-hit. It is reported that the taluka Warah has been inaccessible as its all areas have been submerged into the water approaching from the breach of Warah canal. The union council Junani has drowned and its roads are disconnected. One camp established in mono technical college Warah where 300 IDP families are refugees has been fully submerged into the water approaching from breach of Warah canal.

The rain-hit people lost their mud-thatched houses and were compelled to move to higher grounds and safe places as standing water in their villages causes water-borne diseases, damage to their houses and village infrastructure, and made their lives shambles. Daily life has also been devastated badly for those living in camps or along sides of roads. Water-borne diseases are also increased and the health of children and affected people is at risk. Not only the human population is suffering from heavy rainfalls and flooding but livestock is also suffering due to no proper fodder and drinking water. Many areas are still underwater where the next crop couldn't be sowed. This has started the food insecurity issue in the district. Life in the district has been suspended and most businesses (livestock & agriculture) in rural areas have been closed. The rain-affected population including men, women, and children are left with hope to survive. The affected families are living in desperate need of shelters, tents, medical aid, clothes, food, ration, and drinking water.

The Situation Analysis

District Sanghar receive massive rain showers of up to 716 mm from July to August 2022, which is the highest rainfall in the last 10 years, in whole 12 human-being lost their lives and 14 people were badly injured and 52,498 families lost their shelter/ houses including structural, agriculture & Livestock losses, this is huge historical losses at the district. Currently, 651,840 people from 116,400 families are directly affected. 104,760 persons were displaced from their origins and 35,855 people living in relief camps. Provincial Government through the relief department declared the overall district Sanghar as a climate hit area.

Sanghar is an agriculture base district mainly in the cotton production district was on top at Pakistan, current monsoon rainfall badly affected 1,021,980 acres agri-land including cotton crop which has been damaged 89% in 73 rural Union councils & destructive effect on Agri chain, simultaneously livestock is the main livelihood of rural communities which badly affected & losses of 135 productive animals also recorded.

Most vulnerable families are displaced and living in temporarily short huts on the roadside along with their children & livestock and some communities migrated to the raised areas such as the dunes of the white desert and very few families shifted to relief camps which are mostly in government schools.

Extreme displacement due to rainwater makes the situation worst day by day regarding live survival as the most affected population especially PLW & children face hunger. Delay in the provision of immediate basic needs such as food/ ration, safe drinking water, tents/ shelter, mosquito nets, pit latrines, NFIs, and medical assistance for humans & livestock is a potential threat to the lives of marginalized populations & livestock.

Furthermore, over capacity flew of main water channels such & as the NARA canal, MITHARO canal, JAMRAO canal & ROHIRI canal including LBOD main channel & branches are a potential hazard to overall district rural & urban areas and water tables rising on hourly bases and can be converted in disaster at any time.

In Numbers

116,400 Households and 651,840 populations were affected.

91,235 Houses were Damaged out of which 232,800 were partially damaged and 23,280 houses were completely demolished.

104,760 Households displaced
15, 730 Livestock death.
Cotton and other crops 100% damaged.

Damages of Houses Due to Heavy Rain District Sanghar

Livestock Death District Sanghar

Water Standing in Crops (Cotton) at District Sanghar

THE SITUATION ANALYSIS

THE SITUATION ANALYSIS

Rain flood water is standing in cities, especially in rural areas in all union councils of District Badin. There is no arrangement of drainage of rain flood water which causes an increase of houses to crack, severe damage, and demolition besides no arrangement initiated to support IDPs. The shortage of food for humans and livestock; is found increasing because the community is having hurdles to approaching cities for purchasing food and most of the community assets have been drowning so they are vulnerable to purchase rations. The standing of contaminated water increases mosquitoes causing sickness, and livestock death the community does not have the provision of drinking water and hygiene kits.

IN NUMBERS

- 91,245 Households and 510,972 populations affected.
- 27,347 households have migrated to safe places
- 86,683 houses damaged.
- 8,668 livestock death
- 31 human casualties'
- crops 100% damaged

No. Death people in Rainwater / Electricity/ Lightning strike

Cumulatively, 17 people expired from Rainwater, electricity, and lightning strikes since the inception of rain to date.

Communities' losses

- Katcha and Pakka houses
- Clothes, blankets
- Food and non-food items
- Money/ Jewelry
- Livestock
- Crops

THE SITUATION REPORT

28 AUG, 2022

CALAMITY AFFECTED AREA

Heavy rainfall started in the district Mirpurkhas on 15th July-2022. The district Mirpurkhas is the area that is greatly affected by the flash ongoing rain floods. It has been reported that rain floods not only damaged the houses but also destroyed crops in district Mirpurkhas. This rain badly affected the Union Councils' community migrated to different safe places. In addition, livestock and agriculture badly affected the 50 Union Councils. While most of the communication channels in rural areas are broken and damaged and rain floods also destroyed the standing crops and greatly the livelihoods of inhabitants.

In this wave of rain, community faces so many difficulties to reach their safe places. This wave of the current moon soon creates a many hindrances and difficulties for the people who are living in very remote areas and places. This moon soon also badly affected the mud houses, also affected all kinds of crops in the district Mirpurkhas.

They reported initially that Taluka Digri, Jhudo, KGM, Sindhri, Shujabad, and Hussain Bux Mari are the worst-hit- areas of the district Mirpurkhas due to that most of the community self-basis Katcha houses were damaged in the rain as well as Low-cost housing scheme were also affected during current monsoon rainfall. Viewing this alarming situation conducted a rapid assessment at the community level and collected data on damages and losses that occurred in the community

THE SITUATION

ANALYSIS

Heartbreaking scenes of rain and flood devastation are emerging from all over the district. The Sukkur is one of the worst affected areas during heavy rains and people have suffered heavy losses which include loss of human life, animals, and damage to houses and standing crops. Massive rain severely devastated crops and created food insecurity. Hundreds of people's mud houses were damaged and green spaces turned into water and were hit hard by heavy rains. Hundreds of houses collapsed, people were injured, children suffered from diseases, social life was distrustful and people's socio-economic life was badly affected. Monsoon rains, damaged houses, and roads in all union councils of the district. The Stagnant water increasing mosquitoes caused sickness, livestock death besides community do not have provision of drinking water and hygiene kits and daily food.

No. Death people in Rain water / Electricity/ Lightning strike
Cumulatively, 22 peoples expired by Rain water, electricity and lightning strike since inception of rain till to date.

No. Death Livestock in Rain water / Electricity/ Lightning strike
Cumulatively, 439 animals died by Rain water, electricity and lightning strike since inception of rain till to date.

Communities' losses

- 1.Katcha and Pakka houses
- 2.Clothes, blankets
- 3.Food and non-food items
- 4.Money/ Jewelry
- 5.Livestock
- 6.Crops

In

Numbers

- 43,250 Households and 242,200 populations were affected.
- 2,304 houses damaged
- 944 livestock death
- 1,613 households have migrated to safe places.
- 48 Human casualties and 300 injured.
- 100% Cotton and other crop damaged

DISTRICT GHOTKI SITUATION ANALYSIS

28th August, 2022

BREACHING IN SHANK BAND & RAINFALL SITUATION:

During the heavy rainfall in Sindh, the water level in the Indus River has increased that causing the Breach of 300fts in Shank Band reported on 19 August 2022 at 6:00 AM by the local sources. 50 villages were submerged under water. The condition is going to be alarming if necessary steps will not be taken then other near villages will also be submerged under the water due to a breach in Shank Band. Many people have started to migrate from the village due to standing water.

DRINKING WATER

Due to flash floods and breaches in different water canals, the highly populated areas of the villages are under the water. Contamination like bacteria and nitrate flow from the surface into the groundwater. A downpour like 15_25 inches flash flood inundated the total population of the District Ghotki.

STANDING WATER

water is present everywhere in crops and houses and cities and villages are completely in water.

LIVESTOCK SURVIVAL

Livestock has been affected equally with humans. a huge number of livestock have expired and the surviving livestock is in ill condition with various diseases. There is no medicine and treatment arrangement from the Livestock department.

THE SITUATION REPORT

- 560 Animal Vaccination
- 1156 Animal Treatment

THE SITUATION

VILLAGES - SUBMERGED INTO WATER

HOUSES DAMAGED

MIGRATION

The Torrential Heavy rain/Flood pounded parts of Khairpur district and the government of Sindh declared a calamity affected area to entire district and Government of Pakistan has also announced an emergency to deal with monsoon flooding that it said had affected more than one million people in Khairpur district.

Heavy rains lashed various parts of Khairpur and heavy rain continuous spells have caused rainwater accumulation in several low-lying areas. Khairpur district received a high amount of rainfall under the influence of the ongoing monsoon spell, while several other areas also received moderate to heavy showers and caused urban flooding in all talukas.

The flood and rainwater entered houses and other buildings, villages are 100% underwater and the highest migration took place from the village and shifted towards either open sky or relief. The floodwaters also stand in crops and orchards, and all are destroyed everywhere devastation is reflecting the monsoon impact and due to this many villages' connection with other areas has been cut off due to damage to the roads.

The routine life is paralyzed in the area and roads were the present sight of floods in all talukas of Khairpur. People were reported to stand in lines at camps or community philanthropists for taking cooked food/dry ration bags or any other relief material.

Due to torrential rains in the entire district, the electricity and communication systems were disrupted, while many flood-affected areas were facing difficulties in the relief activities due to the breakdown of the roads due to the disconnection of the ground connection of these areas.

Torrential rain and Flood in the district have caused havoc everywhere, with most areas of the province plunged into darkness due to power outages for the last one week, while communication systems were damaged while disconnected Kotdiji, Thari Mirwah, Faiz Ganj, Gambat, Sobho dero, Ranipur, Naara-Choondiko from other parts of the district. So far 85 people including children and women have been killed in the rain incidents in Khairpur.

Rescue and relief efforts by the Sindh Rural Support Organization are underway in various flood-hit areas of district Khairpur. The relief is carried out with a proper assessment of beneficiaries and reached the destination with a recognized way of serving humanity in a dignified manner.

This is the time to stand with the poor families so that the necessities of life reach the flood victims in time. These victims need our assistance now.
