

Sindh Rural Support Organization (SRSO)

Situation Report # 2 on Flood (2015) affected areas of Northern-Sindh

(July 31, 2015)

1. Introduction:

Monsoon in Pakistan generally penetrates from July to September (One Quarter) and produces widespread rains. While on the other side, early melting of snow and out-burst of glacial lakes have caused the riverine flooding in Sindh through Indus River and widespread rains with thunderstorms producing rainfall flooding in many areas of Sindh Province. At the present, the northern districts of Sindh province experiencing high level of flooding in Indus River and the projected rainfalls. Regarding recent rainfall & flood the PMD and PDMA has already issued alerts/warning to make required arrangements before any unforeseen situation.

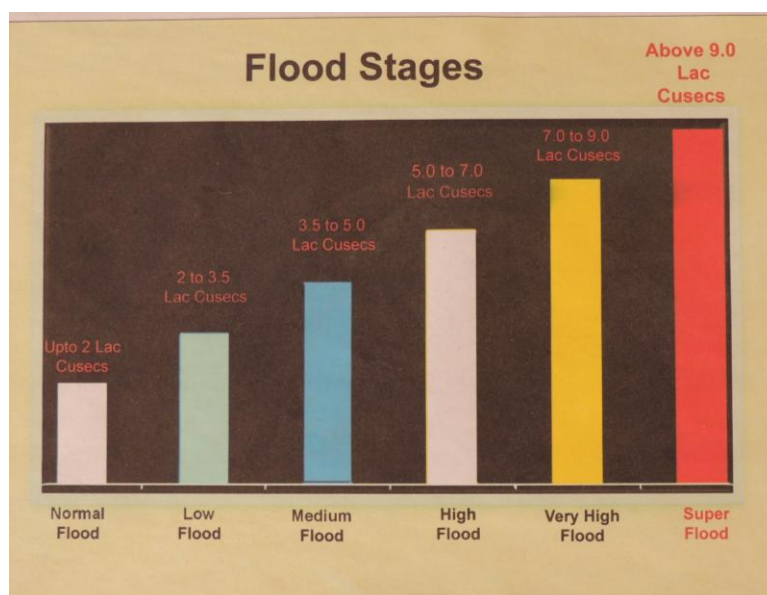

The current flood/rainfall situation report of northern districts of Sindh province where SRSO have been working over the period of 12 years, briefly describes the initial rapid information with respect to the conditions prevailing in these northern districts during the existing floods and rainfalls respectively. Report also provides a quick view of possible support and threats could be attributed to each districts in recent perspectives and arrangements made under present-day context. The district wise brief overview of current situation prevailing given as under:

- Regarding the riverine flood, it has covered majority of the areas of kacha with minimum level. And the flood water has mostly touched/reached the populated areas in kacha, hence reported no any severe situation in the district.

Relief activities in District Larkana:

- In form of precautionary measures, the District Govt Larkana have established 11 medical camps and 2 mobile camps in order to tackle any emergency situation in the districts.
- Commissioner Larkana and his team visited Band and participated in Rescue operation however he said it as transportation to safer place rather to call as rescue. Most of people are not leave their homes at this stage and are ready to deal with emergency

situation by shifting to safe areas by their own boats however District Government is available to provide any kind of support where needed: **said Commissioner to KTN news on 1st Aug 2015.**

Flood situation in Khairpur:

- Normal rainfall experienced in the district, meanwhile no any severe situation reported in result of rains.
- As far as the flood 2015 is concerned, mainly the kacha area of the district are covered under the water of flood. The population of the affected areas have been reported safely evacuated at safe places nearby protection Band with support of district Govt.
- Pak NAVY reached to evacuate people from Kacha area.

Flood situation in Jacobabad:

- In district Jacobabad, the normal slightly heavy rainfall experienced which caused one breach in Saifullah Magsi Canal, resulted more than the 10 villages affected with its water. Medical treatment and shelters are provided by District Government.
- Regarding the flash flooding, no any incident reported during the course of flood days throughout the district.
- Yet the district Govt have taken initial necessary steps to tackle any sudden situation takes place in result of rainfalls or flood.

Flood situation in Qamber-Shahdadkot:

- Normal rainfall experienced in whole district, and no any incident has been reported in result of rainfalls.
- The District Govt have taken all basic arrangements to avoid any situation takes place in result of predicted rains in upcoming days.

2 Relief activities in affected areas:

1. Pakistan NAVY is currently engaged to evacuate people of Kacha area from Sukkur, Ghotki, Larkana, Kashmore and Khairpur Districts.
2. DDMA and PDMA is currently engaged to shift people at safe places and provide temporary shelter near Band.

3. Veterinary Clinics are also provided at District Ghorki, Shikarpur, Kashmore and Sukkur Districts for Vaccination and treatment.
4. PPHI and Government Health department also established their Medical Camps at different locations of Sukkur, Ghotki and Kashmore Districts.

3 Relief activities by SRSO:

- SRSO established a veterinary mobile clinic in order to treat and vaccinate animals evacuated from flood affected areas in district Ghotki, Sukkur and Shikarpur..
- Maintaining close coordination with district Govt in various districts in order to assist in implementation of contingency plans.
- Started the initial assessment at various camps for data collection.
- SRSO have started to chalk out a plan with respective LSOs to determine the needs of flood affected people in various union councils.

4 Immediate Support Needed/Required in flood affected areas:

1. The population recently shifted from their native villages to Protective band are genuinely requiring the safe drinking water.
2. The households shifted at Protective band are also lacking with food items hence requiring food for their families in order to supplement the need on immediate basis, particularly in district Ghotki and Kashmore-Kandhkot.
3. Transportation facility to be provided chiefly in district Ghotki to ensure the 100% proper evacuation from flood affected areas.
4. More shelters/tents need to be provided to the households who have evacuated recently and don't have any tent/shelter at protective bands in district Ghotki and Kashmore-Kandhkot.

(Emergency flood cell number of Jacobabad-0722-652020)

(Emergency flood cell number of Noshero Feroze-024-2448286).

(Emergency flood cell number of Shikarpur-0726-540334).
