Daily Flood Relief Report (August 12, 2010)

Sindh Rural Support Organization

Emergency Relief Centre (Sukkur)
Bungalow No. 106, Street No. 3,
Akhuwat Nagar (Friends Housing Society)
Airport Road, Sukkur.

Flood Situation in Sindh

The Rural Support Programmes (NRSP, SRSO and TRDP has established a consortium office in Karachi and has equipped to support, coordinate, facilitate and monitoring the joint projects. The office is also responsible to engage itself with donors in working with respective RSPs in their operational areas. The major role of consortium is to coordinate and liaison with Government. Mr. Muhammad Ghias Khan is Co-ordinator to the Consortium. For detail please visit our website www.srso.com

SRSO has started to conduct an assessment of affected population with support from WFP for the food distribution offered by WFP. Total 3,241 families in (21) Twenty one Camps in three Talukas namely Tangwani, kashmore & Kandhkot of District Kashmore have been identified and WFP has made plan to distribute 50 Kg Wheat flour and 4.5 Kgs of Edible oil per family.

Planning, negotiation & coordination:

SRSO, either in collaboration with NRSP and RSPN or on an individual basis is working with USAID, WFP, UNICEF RAPID Fund Pakistan, PDMA, corporate sector and individual philanthropists for the provision of relief material such as cooked food, raw food for 20-50 days, safe drinking water, shelter, sanitation and health services.

PDMA is coordinating the flood activities in all the districts and has suggested that WFP starts food distribution from District Kashmir, where the first breach occurred in the protection Bund and the small towns (Karampur, Sundrani Dari, Ghospur, Buxapur, Tangwani, Karampur and Khadim Bux Bhayo etc.) were completely devastated along with the neighboring villages. WFP has taken the list of affected families from the PDMA report and is planning support for over 13,000 (thirteen thousand) families.

Meeting with DCO Kashmir: District Government Kashmir (DCO) during his assessment visits monitored the efforts of SRSO relief workers and extent of the relief provisions, its outreach from the town camps to the remote areas up to the Thori and KK Bund and the assessment procedure and relief material distribution mechanism and its resources being utilized for the relief work for the affectees. The DCO in recognition of that duly paid approbation for the SRSO team. During his meeting with the District team leader declared the SRSO as focal point for all the relief work being carried out in the district and quoted that all the district machinery will be working with relief plan of SRSO.

ENGRO & SRSO: SRSO chief executive held a meeting with the relief coordinator and an extensive discussion was held on district Ghotki situation covering immediate needs of the IDPs. Engro is already engaged in relief at some scale and both the parties discussed a combined approach to address the issue in order to provide the better package of relief.

Dr. Sono explained the relief work being carried out in the District and the projects in pipeline for the same area. It was further discussed that Engro will use SRSO as its implementation partner for the relief work and in a few days they will reach a combined relief package addressed to people who have not been reached by other relief agencies. Engro will prefer to provide shelter and some other packages.

A planning meeting held in DCO office Khairpur to handle the chaotic situation and our media coordinator along with the WFP representative Ms. J.Dorothy regarding the relief activities in the district.

All the district managers (Local relief center in charge) are in close coordination with DCOs of the relevant district and provide and consult them about the relief activities and overall situation as and when needed.

PPHI and SRSO

SRSO is also working with PPHI in order to provide health and treatment facilities to the flood affectees. SRSO has provided vehicles for the mobile medical camps in Khairpur and Sukkur districts.

SRSO Logistic Capacity

The current status of the SRSO's logistic resources is 40 Mazda/Shazore to be used for distribution. Two ware houses have been established of 15,000 and 30,000 square feet at Rohri and Sukkur respectively for the relief material to be stored.

The water and sanitation work is being done in collaboration and support from UNICEF and with the consent of respective district governments. Also, SRSO from its own resources has taken initiative to install shallow hand pumps in Khairpur for 500 people. SRSO team is engaged in need assessment of water and sanitation facilities in relief camps and is installing and providing this facility on very urgent basis.

Drinking water and sanitation facilities status

District	Tehsil	Location	Beneficiary Families	As of previous day				Current day				Remarks
